# INTERMEDIATES

**EVEREST**  
ORGANICS LIMITED 

**Delivering innovative, customer-focused products**

**Choose Everest Organics Limited**

### **About us:**

Founded in 1993, the company specialized in manufacturing API's and Intermediates with its manufacturing facility in Sadasivpet, Hyderabad (50 km from Rajiv Gandhi International Airport).

In 1995, the company became a public listed company and was listed on the BSE, We are a two times USFDA approved Company.

Everest Organics Limited is headed by seasoned professionals who have strong expertise in the field of medical science, marketing and business administration.

### **Our Vision**

We envision to become a global generic player with a strong regulatory focus. We strive with utmost effort and strong determination to meet the challenge of combining our individual competencies to deliver new innovative and life saving API's, at the same time ensuring customer centric service as well.

### **Our Mission**

To develop a well-thought-out plan for producing both mainstream, specialized APIs & intermediates, with a firm commitment to produce high-quality product while being completely accessible to all our stakeholders.

# Research & Development (R&D)

## Innovating for a Healthier Tomorrow

We believe that the future of healthcare is driven by innovation, cutting-edge research, and a relentless pursuit of excellence. Our Research & Development (R&D) division is at the heart of everything we do, advancing scientific discoveries to bring life-changing medicines and therapies to patients worldwide.

With a dedicated team of scientists, researchers, and clinicians, we are focused on the development of breakthrough treatments across multiple therapeutic areas, including oncology, cardiovascular diseases, neurology, and infectious diseases. Our state-of-the-art facilities, along with strategic collaborations with global institutions, allow us to push the boundaries of modern medicine.

### Our R&D Focus:

**Innovative Therapies:** Creating new molecules and biologics that address unmet medical needs.

**Personalized Medicine:** Developing treatments tailored to individual patient profiles, ensuring more effective outcomes.

**Sustainable Healthcare:** Pioneering eco-friendly pharmaceutical production and packaging solutions.

**Clinical Excellence:** Rigorous clinical trials to ensure safety and efficacy before bringing treatments to market.

we are not just developing medicines; we are creating a healthier, brighter future for patients and their families. Together, we can turn today's challenges into tomorrow's solutions.

## CSR Initiative on Water Filtration

As part of its Corporate Social Responsibility (CSR) programme, Everest Organics Limited has installed reverse osmosis (RO) water filtration systems to address the water needs of three local villages. This initiative ensures access to clean and safe drinking water, improving the overall health and quality of life for the residents. Through this project, Everest Organics is contributing to the well-being of the community and promoting sustainable water solutions in rural areas.

### Empowering Local Communities through Training and Employment

As part of its ongoing commitment to community development, Everest Organics Limited actively invests in training and skill-building programs for individuals from nearby villages. Locals with relevant academic qualifications are provided with specialized training to enhance their technical and professional skills, ensuring they are well-prepared for the evolving demands of the industry.

These training initiatives focus on upskilling the workforce in areas such as production, quality control, and environmental safety, aligning with Everest Organics' high operational standards. In addition to acquiring valuable skills, participants in the program are given priority when employment opportunities become available within the company. By prioritizing local talent, Everest Organics not only fosters economic growth but also strengthens its bond with the communities it serves.

This initiative reflects Everest Organics Limited's commitment to social responsibility, creating sustainable livelihoods while driving industrial progress and community well-being.

# CDMO&CMO SERVICES

**EVEREST**  
ORGANICS LIMITED

# Contract Development & Manufacturing (CDMO)

At Everest Organics, our Contract Development & Manufacturing (CDMO) capability is built around one simple principle - we take responsibility for turning complex chemistry into dependable pharmaceutical manufacturing.

**Drug  
Substances**

**Key Starting  
Materials (KSMs)**

**Regulatory Starting  
Materials (RSMs)**

**Intermediates & New  
Chemical Entities (NCES)**

## From Process Understanding to Commercial Supply

Our Contract Development & Manufacturing (CDMO) approach begins with a thorough technical understanding of the chemistry. Before production begins, we carefully evaluate reaction behavior, safety parameters, material compatibility, and downstream requirements. This ensures that what works in developments can be translated into stable manufacturing without surprises.

We work closely with customer technical teams to refine processes where required, strengthen reproducibility, and align with regulatory expectations. Once aligned, we move confidently into manufacturing with full operational ownership.

## Focus on Process Control

In pharmaceutical manufacturing, precision matters. Our Contract Development & Manufacturing (CDMO) operations emphasize controlled execution at every stage from raw material evaluation to final output.

We manage sensitive chemistries, metal-mediated reactions, and specialized transformations through structured procedures and experienced operational oversight. Each batch is approached with consistency, documentation discipline, and compliance awareness. Our objective is not simply to manufacture - it is to manufacture reliably.

# What We Do

Our Contract Development & Manufacturing (CDMO) services include:

Custom synthesis of small molecules

Manufacturing of KSMs, RSMs, and advanced intermediates

Development-linked manufacturing programs

New chemical entity (NCE) production support

Multi-step synthesis execution

Hydrogenation and catalyst-based reactions

Low-temperature and high-temperature reaction management

Chemical and enzymatic resolution processes

We handle complex reaction pathways that require careful control, disciplined execution, and strict adherence to quality systems.

# Compliance and Environmental Responsibility

Our Contract Development & Manufacturing (CDMO) platform operates within established regulatory and environmental frameworks. Manufacturing activities are supported by integrated effluent management systems and responsible process handling practices.

Sustainable production is part of our operational mindset, ensuring long-term continuity for both our customers and the communities around us.

## Regulatory Compliance

Aligned with global pharmaceutical standards and guidelines.

## Environmental Responsibility

Sustainable practices for a cleaner, safer tomorrow.

## Effluent Management

Advanced systems for safe treatment and disposal.

## Sustainable Processes

Cleaner production methods with minimal impact.

## Community Care

Responsible operations for a better tomorrow.

## Continuous Improvement

Regular audits, monitoring and process optimization.

## A Practical Partnership Model

Every Contract Development & Manufacturing (CDMO) engagement at Everest Organics is collaborative. We believe strong partnerships are built on transparency, technical dialogue, and shared accountability.

### Collaborative Approach

Working closely with customers at every stage.

### Open Communication

Transparent updates and technical discussions.

### Shared Accountability

Committed to delivering results, together.

# Partnering for Manufacturing Success

We support customers who are:

Scaling from development to production

Seeking dependable outsourced manufacturing

Expanding global supply chains

Looking for technically capable Indian manufacturing support

Our role is to integrate into your program with clarity, discipline, and long-term commitment.

## Why Everest Organics

At Everest Organics, our Contract Development & Manufacturing (CDMO) work is handled by teams who are directly involved in daily plant operations. The same people who evaluate a process are accountable for how it performs during manufacturing.

**This continuity reduces interpretation gaps and strengthens execution on the shop floor.**

### Experienced Teams

Hands-on teams with deep process and operational expertise.

### Operational Ownership

End-to-end responsibility from process understanding to commercial supply.

### Consistent Execution

Strong systems and disciplined operations ensure reliability.

### Quality by Design

Built-in quality mindset that supports regulatory and customer expectations.

### Dependable Results

We focus on delivering dependable results -batch after batch, program after program.

**"We focus on delivering dependable results"**
